London, September 8, 2025 - [Quantum Systems](#), the leader in AI-powered unmanned intelligence systems for defence, emergency services, and industry – announces a long-term commitment to the United Kingdom with the establishment of Quantum-Systems Ltd. UK, following the full acquisition of Nordic Unmanned UK. Building on local competencies, capacities and value chains, investments of up to €50 million are planned over the next five years.

This expansion directly supports the UK Ministry of Defence's call for greater autonomy and uncrewed systems under its *20-40-40 strategy* – a force mix of 20% crewed platforms controlling 40% reusable platforms such as drones and 40% consumable systems such as rockets, missiles, and one-way effectors. With its full-spectrum ISR portfolio from short- to long-range and its multi-domain and multi-asset software MOSAIC UXS, Quantum Systems is uniquely positioned to deliver against this doctrine.

Strategic Investment in British Capability

Quantum Systems' plan includes infrastructure, local engineering, and partnerships with UK providers. The company will establish Service, Support, Training and Logistics Center (SSTLC) capabilities on demand, invest in maintenance and repair operations, and build training and test infrastructure, creating jobs and strengthening sovereign capability. A MOU with Skyports, will be formalized at DSEI UK 2025, showing Quantum Systems' commitment to the UK ecosystem.

Introducing Reliant: Rise of QS' newest ISR Drone

On the show floor at DSEI UK 2025, Quantum Systems is showcasing Reliant, its latest long range ISR system. Reliant completes the company's aerial portfolio across short-, medium-, and long-range intelligence missions, reinforcing its ability to provide end-to-end solutions for defence and security customers. Like all Quantum Systems drones, Reliant is controlled via its multi-domain and multi-asset MOSAIC UXS software, Quantum Systems launched earlier this year.

Leadership with UK Defense Roots

To lead the UK efforts of Quantum Systems, Vito Tomasi, is appointed as Managing Director of Quantum Systems Ltd. UK. Tomasi began his career in the Royal Marines, with operational deployments worldwide including Afghanistan, before moving into finance with Goldman Sachs and later innovation investment at Speedinvest. His extensive defence experience and leadership in finance and technology uniquely equip him to lead Quantum Systems' UK growth.

"Quantum Systems is here to stay and deepen our investment in the UK," said Vito Tomasi. "By investing in British talent, infrastructure, and partnerships, and by delivering our proven, battlefield-ready aerial intelligence systems, we will contribute to the UK's defence priorities and even exceed expectations."

Trusted Partner for the UK's Defence Future

"Our mission is clear," said Martin Karkour, CRO of Quantum Systems. "The UK is investing in autonomy, resilience, and next-generation unmanned intelligence. With our UK hub, our acquisition of Nordic Unmanned UK, and the leadership of Vito Tomasi, Quantum Systems is committed to being the trusted partner delivering these capabilities for Britain's defence and security."

Quantum Systems is exhibiting its full portfolio of AI-powered unmanned intelligence solutions this week at **DSEI UK 2025 at ExCeL London**.

About Quantum Systems

Quantum Systems is at the forefront of AI-powered unmanned systems. The company's advanced (electric) vertical take-off and landing (VTOL) family of systems, combined with own software, edge computing, real-time AI-driven data, and drone port solutions, are designed to enable operators to make informed decisions with unmatched speed and precision. Founded in 2015 and headquartered near Munich, Quantum Systems operates globally with locations in the United States, Australia, Ukraine, Romania, and in the UK.
